// ABOUT US

Who We Are

PT Mustika Green Indo is a used cooking oil (UCO) exporter headquartered in Ps. Kemis, Tangerang Regency, Banten. Established in 2023, we were founded to address the growing global demand for biodiesel and renewable fuel feedstock derived from waste vegetable oil.

> *"We are more than just an exporter — we are the bridge between Indonesia's circular economy and the world's green energy market."*
>
> — COMPANY PHILOSOPHY

We operate at the top of Indonesia's UCO supply chain — sourcing used cooking oil from verified collector networks across Greater Jakarta, processing and sorting to international quality standards, then exporting to buyers in Europe, China, South Korea, and Japan. Every liter of cooking oil we handle is a real contribution to reducing carbon emissions and growing Indonesia's circular economy.

// VISION & MISSION

Direction & Purpose

VISION

To become the leading UCO exporter in Southeast Asia, driving the clean energy transition through responsible and sustainable cooking oil waste management.

MISSION

- → Build a structured and verified UCO collection ecosystem across Indonesia
- → Export high-quality UCO compliant with ISCC standards and international regulations
- → Empower local collectors with fair pricing and transparent payment
- → Contribute to Indonesia's carbon emission reduction targets

// OUR MILESTONES

History & Achievements

2023 - Foundation

PT Mustika Green Indo was founded in Cisoka, Tangerang. Started building collection facilities and early-stage local collector networks.

2024 - Network Expansion

Reached a collection capacity of 500 tons per month. Expanded operational collection points across the Greater Jakarta area.

2025 - Certification & Export

Obtained ISCC Certification and officially commenced direct UCO exports to European and East Asian markets (China, Japan, Korea).

// LEGAL

Identity & Legality

Our company is officially registered and operates in full compliance with Indonesian regulations.
